

I chose not to receive XM radio in my automobile, so I do not pay a monthly fee. I do, however, feel that XM Radio should have the right to broadcast XM Instant Traffic & Weather. If you want to restrict broadcasts, make the ones that are too nasty for our children to hear. Michigan has laws against people swearing when children are present; maybe that should be extended to broadcasting too.

I think that new technology, like cell phones, is great. XM Radio is just another example and should be allowed some freedoms not limitations.
